

onnetwork.tv

Interactions

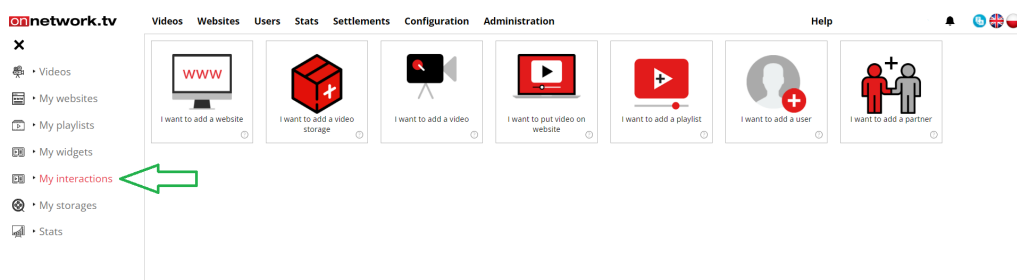

1. First, please select tab Videos and click Add a storage.

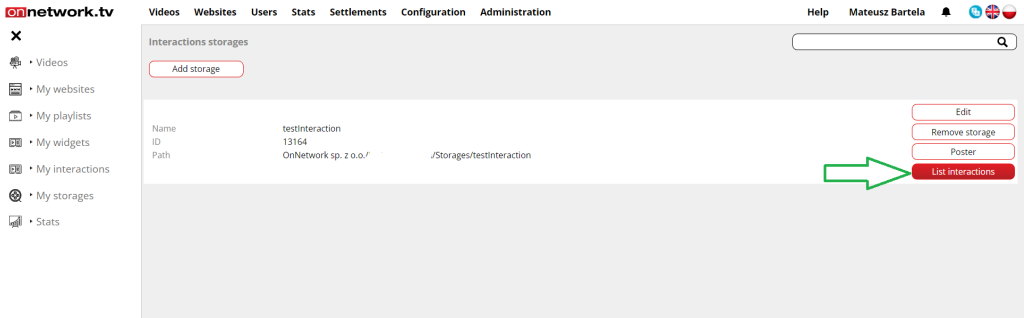

2. When adding storage set Name and change Storage Type to "Interactions"

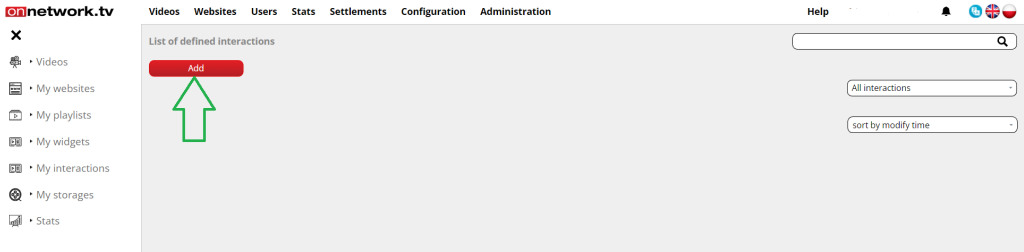

3. After that select tab My Interactions

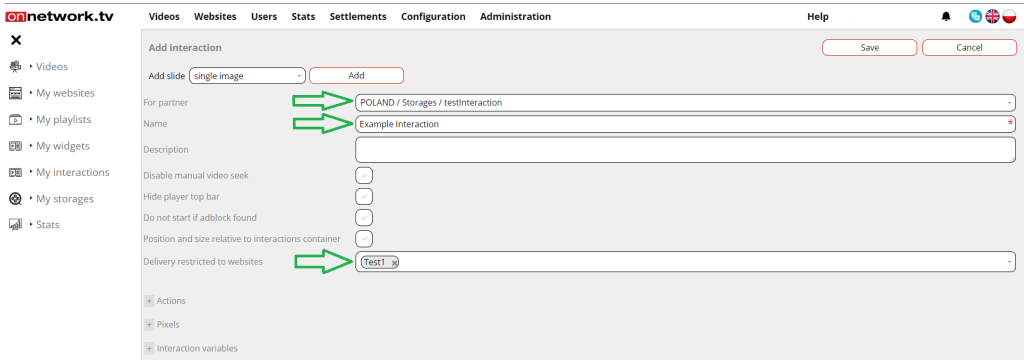

4. After that click "List Interactions"

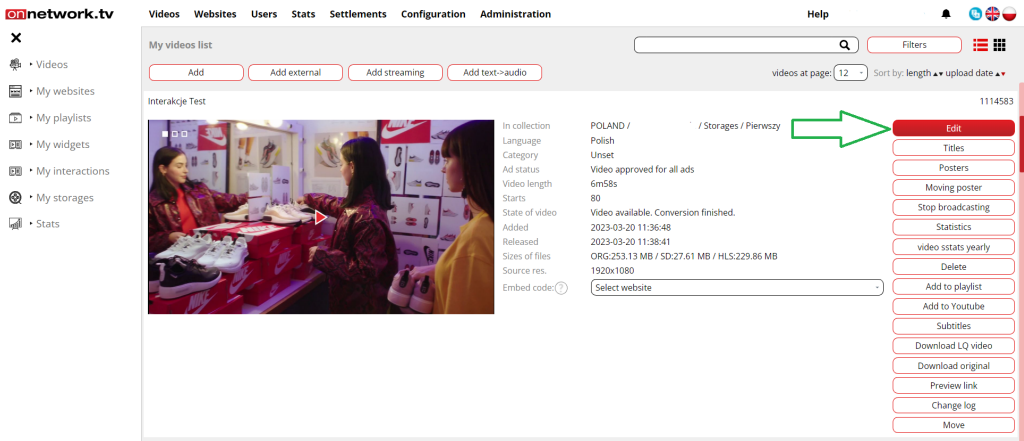

Click "Add" button

Then select for which partner the interaction should be, set the name of the interaction and select the website for which the interaction should be.

You now need to go to the "My videos" tab and then click on edit for the video in which the interaction is to occur.

Expand the "Additional interactive options" tab and select Your interaction.

3. This setting allows the material to be replayed

4. Here are the show times so that the material will scroll to the final screen at the end of it

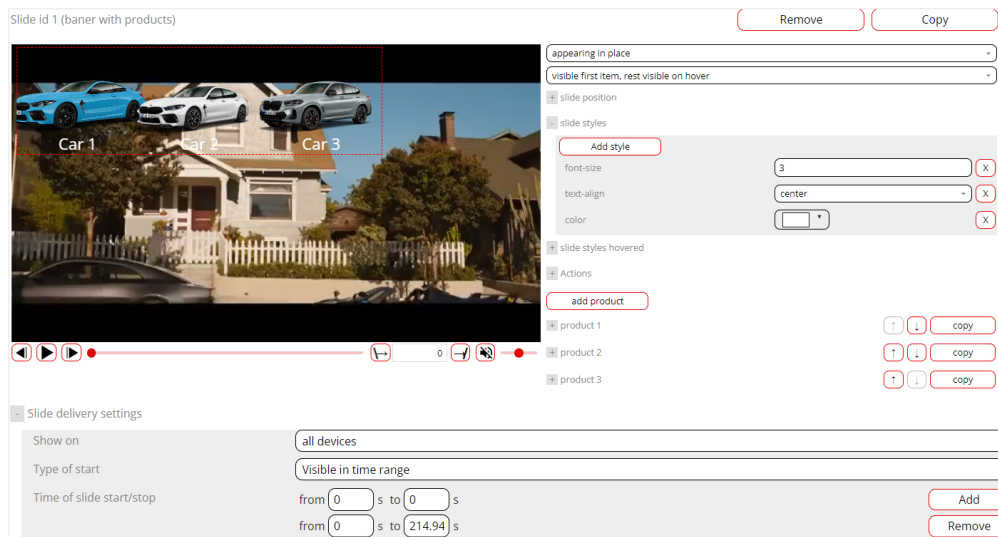

5. Here are the durations of the shows on which there is a button which is a link to the shop thanks to the **"on click - Redirect"** option

7. Below You will find a simple interaction with baner with products setup

1. Here You will find an example of this interaction [\[Example\]](#)
2. 3 products were added, font size and colour changed. Only the first product will be visible and the rest when hovered over. The banner will be in the time range from 0s to 214.94s

3. An image was added to each product with a maximum width of 300px and the text at the bottom "Car X", to which a style when the cursor is hovered that changes the background colour in 4 seconds. With the **"on click - Redirect"** action, clicking on the image takes you to the link provided

8. Below You will find a simple interaction with single image

1. Here You will find an example of this interaction [\[Example\]](#)
2. One image has been added by pasting the image url code into the appropriate place. When you click on the image, it redirects to the page where you can purchase this product. The image will be visible in the time range from 0s to 25s

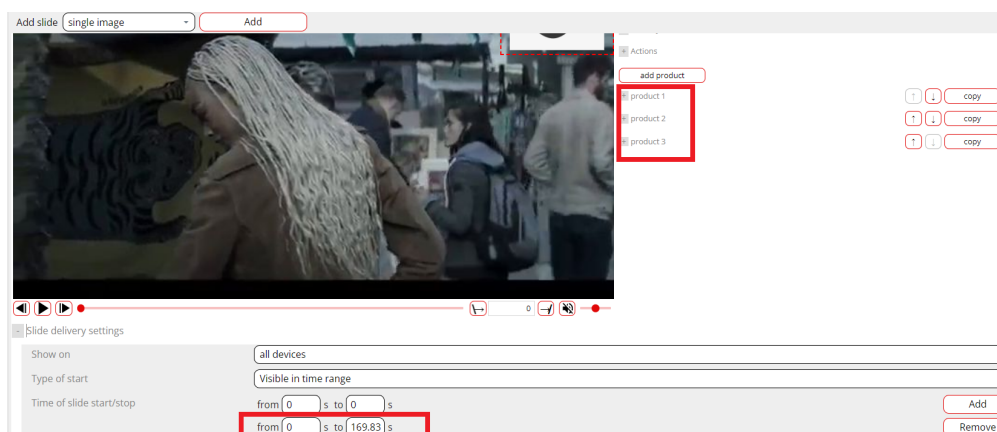

3. Options have been manually added to change the size of the image.

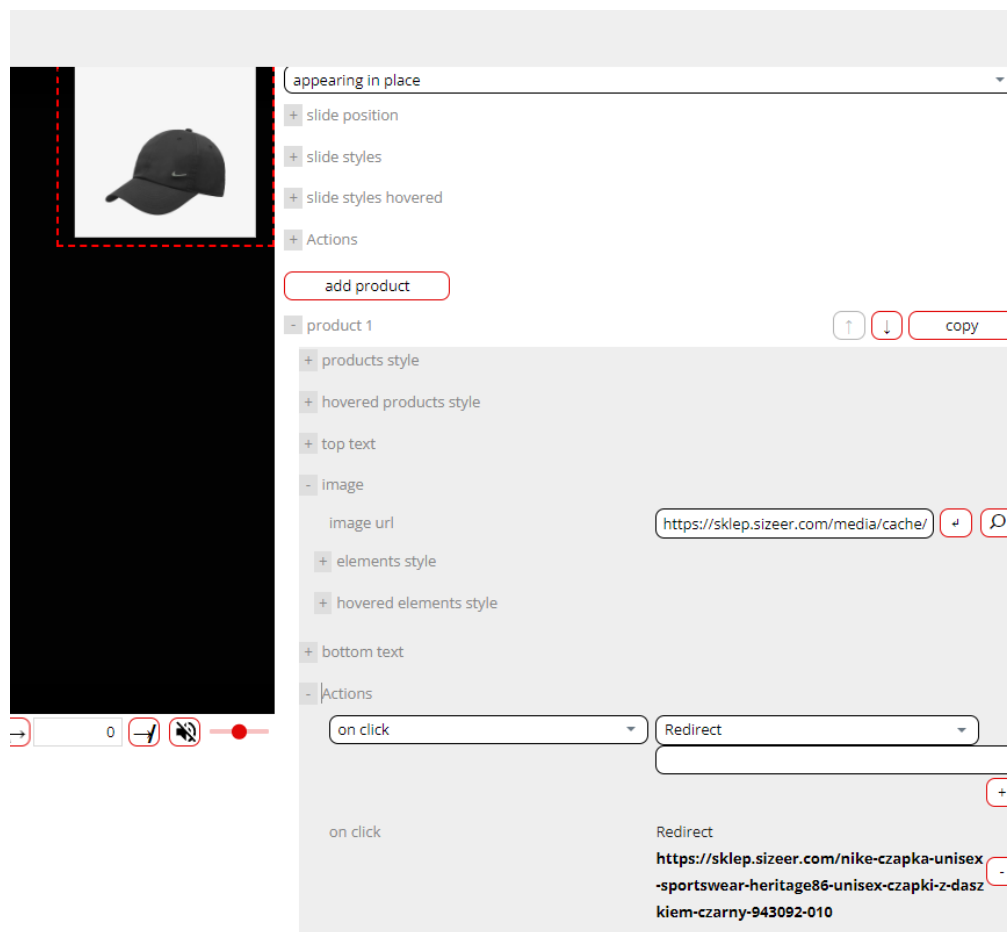

9. Below You will find a simple interaction with products slide show

1. Here You will find an example of this interaction [\[Example\]](#)

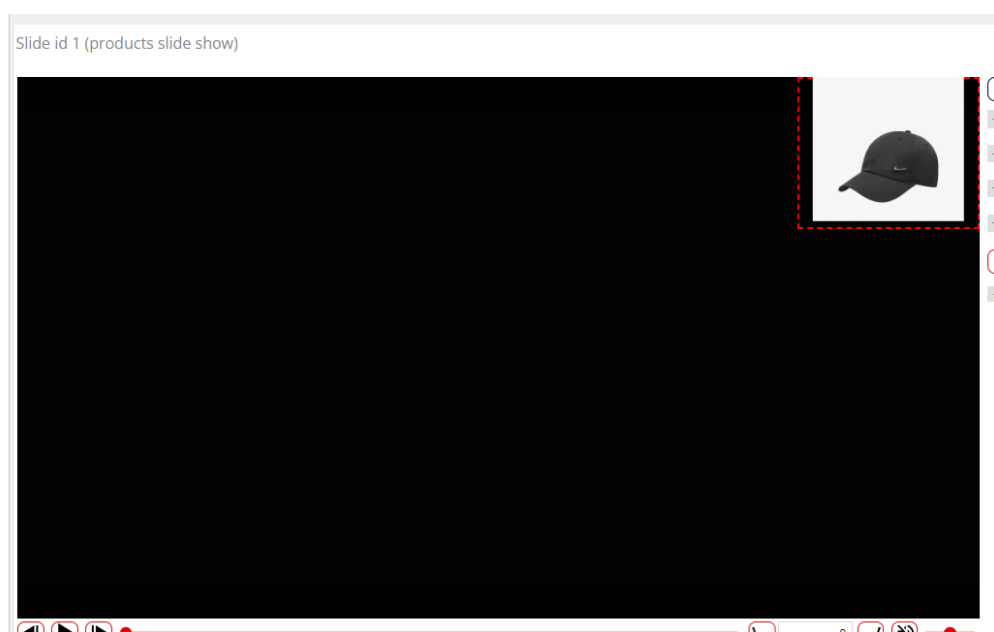

2. The show includes 3 products that will be displayed from the beginning to the end of the material.

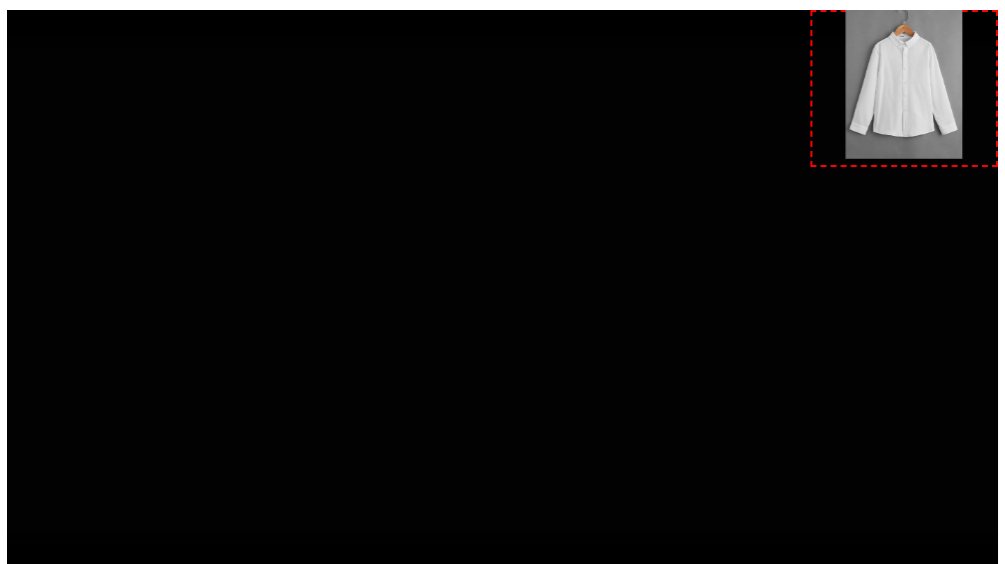

3. For each product there is an assigned image and an action that will make us redirect to a particular page when we click on the image.

4. During the video, interactive images of the product will scroll in the area of our choice.

10. **Below You will find a simple interaction with text**

1. Here You will find an example of this interaction [\[Example\]](#)
2. A caption is displayed on the material, redirecting to a product page (in this case, a computer game from the video). The font size and background of the text box have been changed.
