# onnetwork.tv

Using more player's on website

1. When using more than 1 player on a page, we recommend using it with single article videos and an additional playlist or widget at the bottom of the page, which will start automatically with the thumbnail providing the advertisement, while the video will only start when it is visible and the playlist/widget stops providing the thumbnail.

Follow this link to see how such settings work [Example]

First, go to Website Option

and select the options shown in the appendix.

Then go to the **website** desktop/mobile settings

and set those options as marked below

Then configure in **playlist** desktop/mobile settings

Website playlist **Test2**

Add playlist

Name	playlist test
Playlist number	3435
Website	Test2
Tags	sport
Auto addition	YES (5)
The Broadcasting code for the playlist: ⑦	<script type="text/javascript" src="https://video.onnetwork.tv/embed.php?sid=M2k3LDAsd0Y="></script>
